

## Activity 8

### “If This is True – What Will Happen? – Thinking About Impacts”

Goal: understand the importance of long-term impacts

Student sit in pairs.

The teacher gives a statement and asks the students to think of results/impacts of a certain event (a similar procedure as in Exercise 7: “For Example?”):

- Somebody wins in a lottery – what might happen to her after this?
- A car runs out of gas in the middle of the crossroads – what might happen after this?
- Heavy rain floods the streets – what might be the impact of this?

These examples could be replaced by different ones.
